

DAY 2

TIME	ACTIVITY	LEARNING OBJECTIVES / GOALS	INSTRUCTOR
09:00 - 09:30	Special Circumstances in Resuscitation (Pregnancy, Trauma, Asthma)	Resuscitation strategies will be tailored to patients with unique pathophysiology.	Dr. Gamze BOZKUŞ
09:30 - 10:00	Special Circumstances (Toxicological Emergencies)	Diagnosis and management of toxin-induced cardiac arrests, including antidote use, will be taught.	Dr. Fatma ÇAKMAK
10:00 - 10:15	Coffee Break		
10:15 - 10:45	Special Circumstances (Environmental Emergencies)	Participants will learn interventions for resuscitation in conditions like hypothermia, hyperthermia, and drowning	Dr. Sema AYTEN
10:45 - 11:15	Special Circumstances (Stroke, Pulmonary Embolism, Thrombolytics)	Rapid identification and treatment strategies for underlying causes like stroke and PE will be covered.	Dr. Ayşe Büşra ÖZCAN
11:15 - 11:30	Coffee Break		
11:30 - 12:00	Ethical and Legal Aspects of Resuscitation	Ethical issues, DNR decisions, and legal responsibilities in resuscitation will be addressed.	Dr. Zeynep ÇAKIR

Time	Room 1 (Airway)	Room 2 (Dysrhythmia)	Room 3 (Rhythm)	Room 4 (Scenario)
Learning Objectives and Goals	Participants will learn and practice both basic and advanced airway management techniques to ensure effective oxygenation and ventilation during resuscitation	The goal is to recognize and differentiate common dysrhythmias and apply appropriate treatment protocols, including pharmacological and electrical interventions.	Participants will interpret ECG rhythms accurately and decide on the correct ACLS algorithm based on the patient's cardiac rhythm.	This room simulates real-life cardiac arrest situations, aiming to integrate team-based resuscitation skills, leadership, and clinical decision-making under pressure.
13:00 - 13:30	A	B	C	D
13:30 - 14:00	B	C	D	A
14:00 - 14:15	Coffee Break			
14:15 - 14:45	C	D	A	B
14:45 - 15:15	D	A	B	C
15:15 - 15:30	Coffee Break			
15:30 - 16:15	Post-Course Assessment Test			
16:15 - 17:00	Certificate Ceremony and Closing
