Career in Health Summit and Expo

7-10 July 2021 | Exponext Digital

Your future is in your hands...

Rich contents that add vision to the future of health professions at the center of health education and employment... National and international education opportunities for young people who want to steer their careers in the healthcare field...

Inspirational speeches from the authorities of the world's best universities and institutions... In today's world where digital technologies center on our lives, new normals, new norms, and habits utterly change the social and economic structure of societies. Digital technologies, promptly becoming a part of our lives, transform all sectors and occupations, health in particular.

How are Medical Professions Transforming?

As the advanced applications, smart systems and technologies and developments such as artificial intelligence technologies in the health IT field are steering the future health occupations, new professions, finding their places in the health field, such as 3D production engineering, artificial intelligence supported health technician, biotechnology, nanotechnology engineering, drone pilot, data analyst have already entered our lives. Health professions are as well evolving with digitalization and medical professions are reforming in the light of all these developments in today's transforming and changing world.

Let's Shape the Future Together

The Career in Health Summit and Expo, where new approaches in the medical professions will be added to the agenda along with the subjects such as defining the future health occupations and positioning them accurately in the system, aims to establish a consultation environment by gathering subject matter expert health professionals from public, private, and academy to improve employment in the health field and increase the quality of health education.

Furthermore, the Career in Health Summit and Expo, planned to form a platform to guide young people who want to pursue a career in the health field and carry their careers further as well, will gather young people, wanting to steer their careers in the health field, and universities active in this field, and educational institutions on Exponext Digital Platform between 07-10 July 2021.

With the Career in Health Summit and Expo outputs, we invite all health professionals who contribute to health education to our event with the desire to be a resource for the health authorities and policymakers and to lead young people, planning a career in the health field and we wish you healthy days.
